

Northern Community Health Centre Update

You are invited to view the project team's responses to community feedback about the Northern Community Health Centre planning proposal.

In total, 16 submissions were received in response to the public exhibition of the application. This included submissions from government agencies and the general public.

The Response to Submissions Report will be used, along with the Environmental Impact Statement, to determine whether the development should proceed, with a final determination expected in August 2014.
